About Me

A driven and enthusiastic professional eager to leverage strong adaptability, collaboration, and a positive attitude in a dynamic environment. Dedicated to contributing to a supportive and growth-oriented workplace, providing exceptional service, and learning from industry experts to continuously enhance skills and impact.

Skills

Frontend Technologies: HTML, CSS, Bootstrap, JavaScript

Backend Technologies: Java, PHP, Python, Next.js, React.js, Django, Express.js.

Database: MySQL, MongoDB

Tools: Azure Web Services, Postman, Github, Git, GitLab, Canva, Visual Studios Code, Android Studio, Google Search Engine, Wordpress, Figma.

Prompt Development Tools: Chat GPT, Gemini

Operating Systems: Windows, Linux(Ubuntu, Kali).

Soft skills: Software Networking, Problem Solving, Communication, Adaptability, Time Management, Computer Skills, Active Listening, Collaboration and teamwork.

Projects

- **Encryption Hashing Website**

Developed a web application with user registration and authentication using AES encryption and SHA256 hashing for secure password storage in a SQLite database. Check the code base [here](#)

Technologies Used: HTML, CSS, JavaScript, PHP, SQLite database.

My Role

- 1) Research of PHP libraries to be used.
- 2) Part of Login page Encryption Logic making.
- 3) Coded the entire frontend of the website and core encryption algorithm of the Sign up/Login page.
- 4) Created the SQLite database.
- 5) Part of Login authentication system planning, Hashing algorithm development and Documentation.

- **Portfolio Website**

It is a simple website where a person can get information about me, download resume, look for my past projects and ask in an email for assistance in my field of expertise. Check out the website [here](#)

Technologies Used: HTML, CSS, JavaScript

Responsive Design: The website is fully responsive, ensuring a seamless experience on mobile and desktop devices.

Interactive Navigation: Includes a hamburger menu for easy access to different sections on mobile.

Showcase of Work: A section dedicated to my projects and skills.

Downloadable Resume: A button to download my resume for potential employers or clients.

- **Note API**

Developed a RESTful API which can perform CRUD Operations using Postman API tool. Check out the code base [here](#)

Technologies Used: Node.js, Express.js, MongoDB

MongoDB Setup: Used MongoDB to store notes, where each note should have a title, content, and timestamps for creation and last modification.

CRUD Operations Endpoint:

- 1) Create Note: Endpoint to add a new note to the database.
- 2) Retrieve Notes: Endpoint to get a list of all notes, with an option to retrieve a single note by its ID.
- 3) Update Note: Endpoint to modify the content of an existing note.
- 4) Delete Note: Endpoint to remove a note from the database.

Error Handling: Created comprehensive error handling for the API, covering scenarios like invalid input, trying to access or modify non-existent notes, etc.

Basic Authentication: Added a simple authentication mechanism (Basic Auth) to protect the endpoints.

Experience
